

If you are looking for a great buy on a Baby Grand Piano, all you need to do is shop around and do a little bit of research.

As a pianist, piano technician, and piano dealer, it is my job to do this for my customers, in order to find the very best values available today. □ New choices are coming to market at a time when many piano dealers are being forced to close their doors, so it is not as easy to find the brands that are offering the best value.

Nick's Piano Showroom features quality baby grand pianos with premium features starting at just \$6495. □ All pianos receive thorough make ready dealer preparation for the best sound. □ Similar quality pianos cost much more at other stores in the Naples and Fort Myers Area. □ No wonder that 90 percent of the pianos sold at Nick's are grand and baby grand pianos, most of which include player systems.

Brands of baby grands featured at Nick's Piano Showroom such as Baldwin, Brodmann, and Ritmuller offer quality that is comparable to or exceeds that of Yamaha or Kawai for substantially less. □ For quick reference to this fact, simply consult the Pianobuyer.com ratings chart for a snapshot of the market for mid-grade pianos:
